

## ARMS Singapore Chapter Seminar

### **Maximizing Research Impact: A Comprehensive Framework for Research Administrators and Managers**

Date: 12<sup>th</sup> June 2023

Time: 2.30 pm to 4 pm

Venue: LHN-TR+25, The Arc, Nanyang Technological University Singapore  
(Location Map: Click [here](#))

Time	Programme
2.15 pm	<b>Registration</b> Participants to be seated by 2.25 pm
2.30 pm	<b>Presentation</b> by Dr Tamika Heiden, Former Co-Convenor of the Research Impact Special Interest Group, ARMS Victorian Chapter
3.15 pm	<b>Interactive Q&amp;A session</b>
3.30 pm	<b>Tea break cum Networking session</b>
4.00 pm	<b>End of Programme</b>

### **Event Abstract:**

This is a highly engaging one-hour seminar designed specifically for research administrators and research managers in universities, presented by Dr. Tamika Heiden from the Research Impact Academy. In today's competitive research landscape, it is crucial to understand how to support researchers in making a real-world impact with their work. This seminar will provide you with a solid understanding of impact fundamentals and introduce a practical framework that can help you streamline the process of creating, communicating, and evaluating research impact.

During this interactive session, Dr. Heiden will delve into:

- The essence of research impact and its relevance in today's academic environment.
- Key strategies to foster a supportive environment for researchers to generate meaningful impact.
- A step-by-step framework that simplifies the process of identifying, planning, and assessing research impact.
- Effective ways to communicate research impact to diverse stakeholders, including funding bodies and the general public.

### **Speaker Biography:**

Dr. Tamika Heiden is an esteemed expert in research impact and the visionary behind the Research Impact Academy, a global community that empowers researchers and research administrators to secure funding and transform lives. As an ardent advocate for interdisciplinary collaboration and innovation, Dr. Heiden has played an instrumental role in shaping the world of research through her ground-breaking work at the Academy.

Dr. Heiden's journey began with a natural curiosity and the desire to discover new things, help people, and change the world. These values have remained steadfast throughout her life, fuelling her commitment to the research community and propelling her toward a path of extraordinary achievement.

She founded the Research Impact Academy to bring together researchers, research administrators, and entire teams and organizations from around the world. In the last five years, her international award-winning team has helped secure over US\$25 million in funding, shaping discoveries into exceptional impact.

Throughout her career, Dr. Heiden has observed that the discovery of new evidence alone is not enough to uncover solutions. She realized that collaboration is crucial for impact, and that weaving together expertise from end-users and diverse disciplines beyond pure research is vital for empowering people to use discoveries for positive change. This realization led Dr. Heiden to create the Research Impact Academy as a platform for fostering collaboration and driving meaningful change.

Dr. Heiden is dedicated to sharing her knowledge and passion for research impact with others, offering top tips and stories from extraordinary researchers to help others create their own impact magic.
